

Week_25

Trinity Coding 4 Kids

03/25/2024

Welcome Students!!!

Tell me something positive that has happened over the weekend.

We will begin our Class with A review:

Touch Typing is a very important skill ! And I am so Proud of each student, you are learning a skill that will be with you for the rest of your life! As you do a hard thing <Learning>, touch typing will be easier... Each key that you learn is one behind you!!!

Touch Typing REVIEW:

Posture & technique

Sit with your back straight and your feet flat on the floor. You should have your arms next to your body in a comfortable position. Make sure the F and J keys of the keyboard are immediately opposite the middle of your body. When typing, keep your elbows close to your body, wrists and forearms at a 90-degree angle and at the same level. After striking each key return your fingers to their *resting* position on the **home row**.

Proper Keyboarding Techniques

- Sit up straight
- Feet flat on the floor
- **Body Centered on the Letters G and H**
- Elbows bent at side
- Fingers curved and resting on Home Row Keys
- **Thumbs resting at Spacebar**
- Eyes on your monitor

Touch Typing - is a style of typing without looking at the keys as you type. Although the phrase refers - typing without using the sense of sight to find the keys. **A touch typist will know the location of the keys on the keyboard through muscle memory.**

Our number one rule is

"Don't Look at the Keyboard"

Learn the finger for each key and memorize the location, the practice typing a key while NOT looking at the keyboard.

From this image: what keys does the left hand middle finger hit?
 What keys does the right hand (4th) finger hit?

ou
