

Week_28

Adding Content & Images from the internet

- 1) Perform research on your topic:
 - Start from an outline (overview - general - specifics)
 - wikipedia, google(search), foxnews.com, dictionary.com
 - wikihow.com, quora.com
- 2) Add images - every good web site has big colorful images - they add live to the page.

Today's exercise -

** Create a new directory:

C:\Trinity\Web_Design\Web_Site_Project

** Create a sub folder

C:\Trinity\Web_Design\Web_Site_Project\research

C:\Trinity\Web_Design\Web_Site_Project\research

** Create a sub folder

C:\Trinity\Web_Design\Web_Site_Project\images

** First research your topic - find interesting facts, articles, and information (Overview, General & Specific) about your Web Site Topic.

Create a file:

C:\Trinity\Web_Design\Web_Site_Project\research\notes_and_info.txt **USE** notepad to write or Copy+Paste into this file; make the file more than 1 page. Note: You will use this file to copy+Paste into your web site.

Next: on your home page - **add 3 images:**

1) Large Image (filling the whole page)

ALSO - 2 images in two columns.

Microsoft Paint

From Wikipedia, the free encyclopedia

Microsoft Paint (formerly **Paintbrush**) is a simple [raster graphics editor](#) that has been included with all versions of [Microsoft Windows](#). The program opens and saves files in [Windows bitmap](#) (BMP), [JPEG](#), [GIF](#), [PNG](#), and single-page [TIFF](#) formats. The program can be in color mode or two-color [black-and-white](#), but there is no [grayscale](#) mode. For its simplicity and that it is included with Windows, it rapidly became one of the most used applications in the early versions of Windows, introducing many to painting on a computer for the first time. It is still widely used for simple image manipulation tasks.

How to Capture an image from the internet:

Strategy 1) - from the image right_click and select "Save Image As"... copy to

c:\Trinity\Web_design\Web_Site_Project\images\image_1.png

Strategy 2) View the image (you want to save),

Push the "Print Screen" button (Keyboard - top right 3rd button).

Load up Microsoft Paint :

[File]

[New]

Then -

[Paste] - should display the image.

Next - click [Select]

Use the mouse to select the top left corner of

The area you want to select/save.

Hold the mouse, and drag while holding the mouse

To the bottom right corner of what you want to save.

Then release the mouse button.

Then hit the sizers(icon) or select "Cut".

Press [File] [New] "Don't Save"

Press [Paste]

There should be your image.

Next : save your image

[File] [Save As]

Select [png]

Save to c:\Trinity\Web_design\Web_Site_Project\images\image_1.png
