Trinity Web Site Design

04/27/2020

Today's class we will do the following:

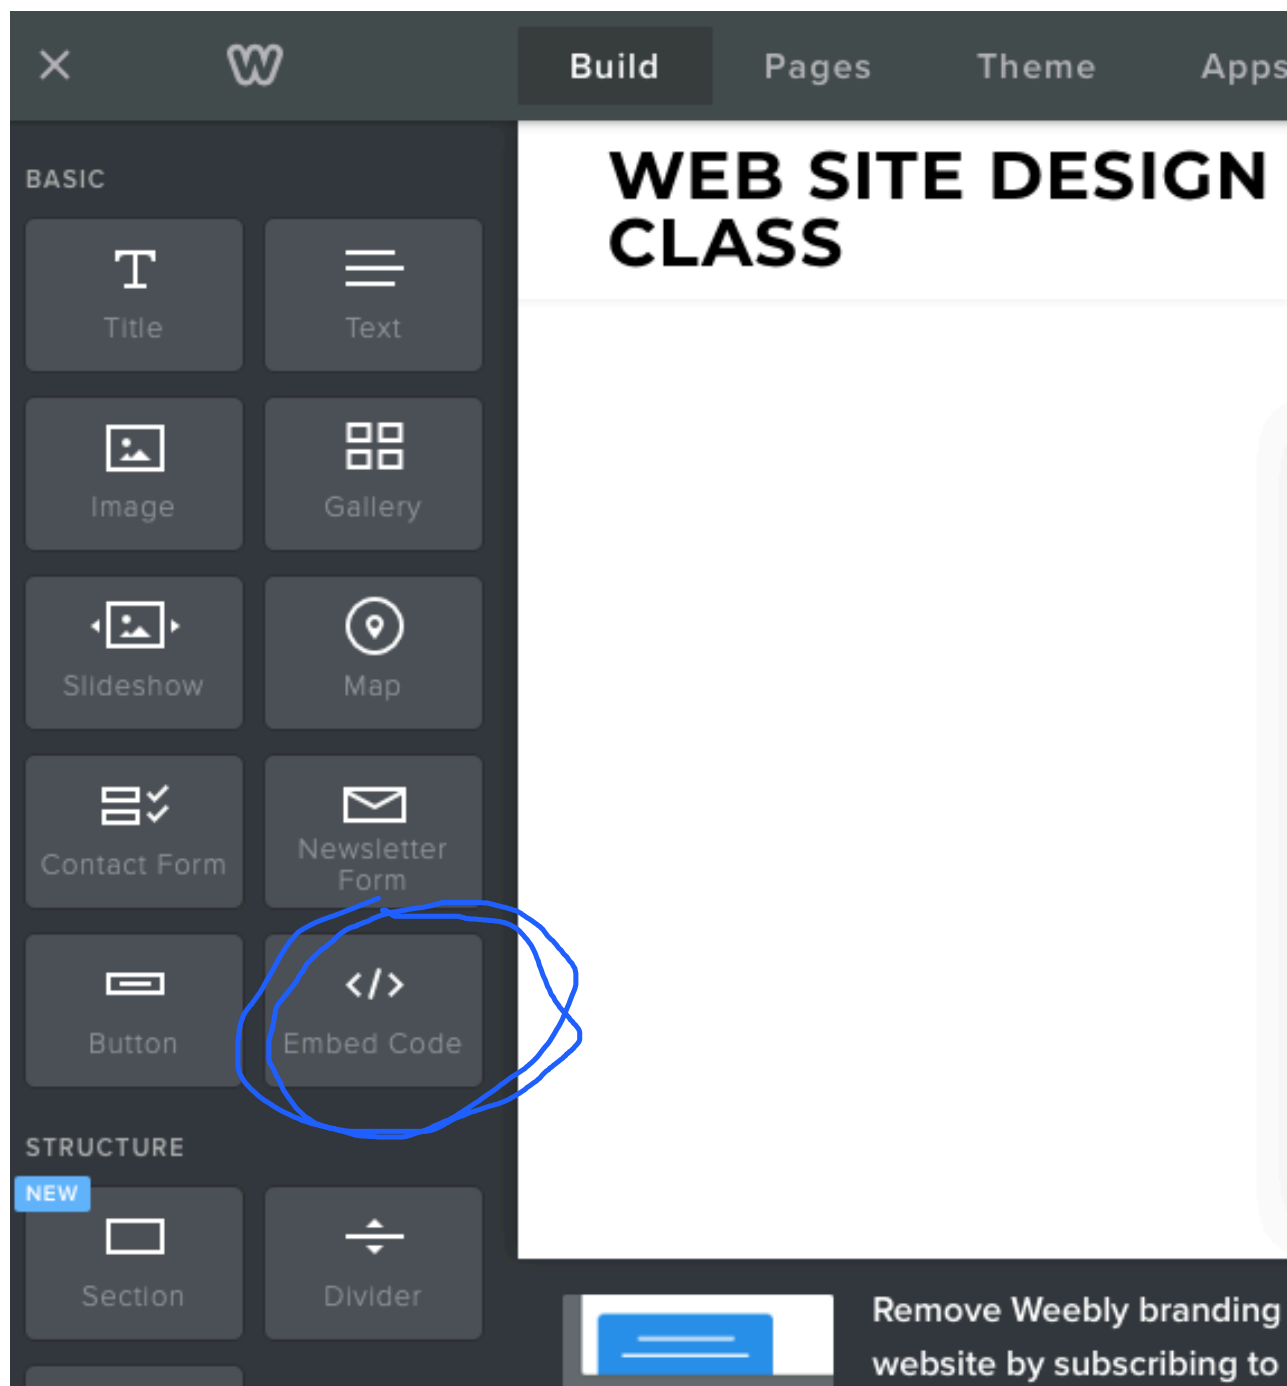

- (1) continue developing our web site
menu's, pages with content
titles, text, images
- (2) add raw HTML to your page...

Students we remember what HTML stands for:

STUDENTS WE REMEMBER WHAT HTML STAYS FOR.

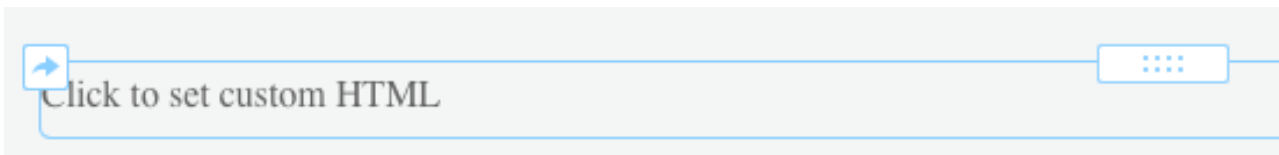

Hyper Text Markup Language.

We can add HTML code right into our Weebly Page:

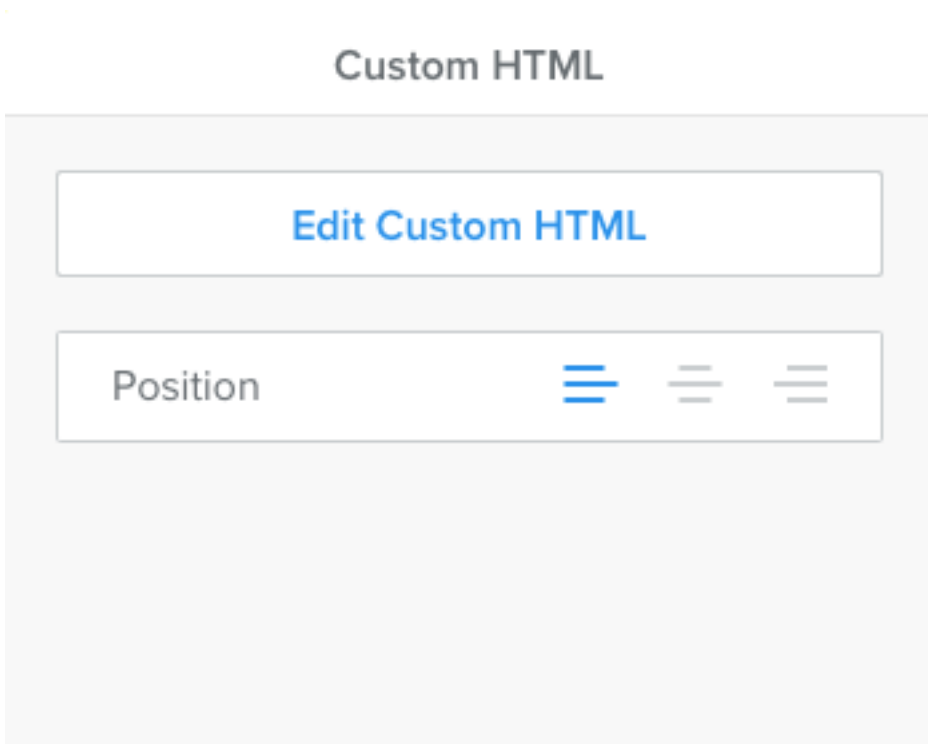

Once you click and drag & drop the [Embed Code] to the location you want.

You can do the following:

Click to add custom HTML:

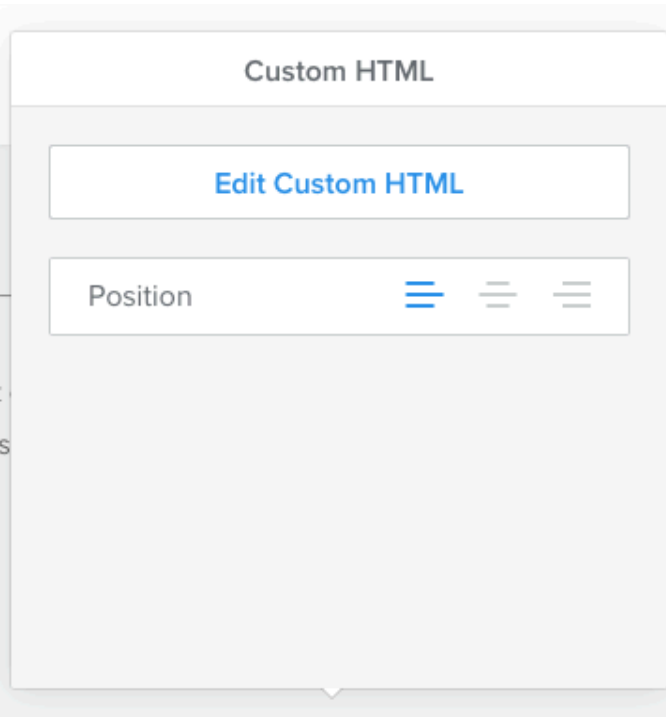

WEB SITE DESIGN CLASS

Heading Information

This is information that will be the content of the web page. This information is data that is to fill up a paragraph on the web page. This information is reverent and part of the web page content.

Heading 2 information

```
<h1> Heading Information</h1>
<br>
<hr>
<br>
<p> This is information that will be the content of the web page. This specific information is reverent and pertains to the Heading information. This information is data that is to fill up a paragraph on the web page. This information is reverent and part of the web page content.</p>
